.Podiatry Burr Tool Holder (Carbide Rotary Burs)

Billet Designs - USA was asked by medical supplier “Precision Surgical Supply” to design and manufacture a podiatry burr tool holder. Their suggestion was a base that was the shape of a foot.

The result is the best looking burr holder on the market… bar none. The Burr Holder will hold up to (15) 3/32” diameter shank burr tools. The burr holder is made from anodized aluminum and has a polycarbonate cup. This burr holder is the highest quality available.

We intentionally created it in the shape of a foot to provide a fun, functional burr holder that is sure to be a conversational piece in your medical office. Our burr holder holds up to fifteen podiatry burrs in one foot allowing you to keep a wide variety of burrs organized in one convenient place.
